

LINOLEUM

SPECIFICATION

Material Type Linoleum

ABOUT

Linoleum used for furniture is an elegant natural material based on linseed oil and wood flour. Like all natural material, linoleum has a warm surface that is pleasant to touch. It also makes less noise than artificial materials. Linoleum used in furniture is single-coloured and has an exclusive, matt surface that is suitable in conference rooms and other environments that require a smooth, warm and soundproof surface that is not fingerprint sensitive.
