

VENEERS

SPECIFICATION

Material Type Veneer **Pattern** Melange

ABOUT

Wood veneer is a beautiful natural material that gives interiors life and an exclusive feel. Veneer feels warm and smooth to the touch, and generates less noise than artificial materials. The material is produced by slicing solid wood into thin layers and gluing them onto a top. We offer veneers in ash, birch, beech and oak, in clear lacquer or stained finishes. When the veneer is stained, various coloured pigments are added, giving it a coloured surface while maintaining the wood structure. The raw wood for our veneers comes from responsibly managed forests.

COLOURS IN THE VENEERS SERIES

Ash Black

Ash Dark-Blue

Ash Dark-Green

Ash Dark-Grey

Ash Dark-Red

Ash Grey-Blue

Ash Grey-Green
